

Test Engineer BI (M/V)

Lloyds Bank, locatie Amsterdam

Lloyds Bank is onderdeel van Lloyds Banking Group, de grootste bankengroep van het Verenigd Koninkrijk. De Nederlandse vestiging, met ruim 130 medewerkers, is anders dan andere Nederlandse banken. Dat merk je aan onze eigenzinnige, gedurfde visie op de markt. Aan onze innovatieve producten en diensten. En natuurlijk aan de korte lijnen voor onze klanten. Lloyds Bank doet jaarlijks mee aan de Great Place To Work survey, waarbij we een plek op de lijst van 'Best Workplaces' verdienen!

Voor onze afdeling Systems & Digital zijn wij op zoek naar een: Test Engineer BI.

CORE PURPOSE OF THE ROLE

The Test Engineer is part of the Systems & Digital Team and reports to the Manager Systems & Digital.

As test Engineer you are responsible for the implementation, execution and delivery of testing for Data Warehouse. This data warehouse contains all financial and financial risk data of the entire Lloyds Bank GmbH Netherlands. The data warehouse will be expanded in the coming years due to the increasing amount of required reporting functions and increasing amount of data sources needed for reporting. The system is of strategic importance for the Lloyds Bank for internal and external reporting purposes, especially reporting to regulators.

If you like;

- working on a broad spectrum of challenges and solving complex puzzles;
- quickly changing gears from technical to functional aspects and then back again;
- working in a multinational team;
- working on the technical side of a very large data warehouse;
- working within a Scrum team on technical topics;
- and working within one of the most strategic programs within the Bank?

Then the test Engineer job fits you perfectly!

KEY ACCOUNTIBILITIES

You do this by;

- positioning yourself as a dynamic test engineer with a specialisation in data warehousing, business intelligence and a passion for continuous improvement of our application. You can create a data fundament and are able to quickly and efficiently solve (potential) problems. You work together with other specialists proposing solutions for complex problems.
- Building and maintaining the automated test suite(s)
- Coordinate the testing process so that all relevant requirements are met by Planning all testing activities;
- best practice and quality are maintained or suggestions for improvement submitted and ensure that any issues are dealt with;
- Challenging the developers and business analyst on all topics related to quality.
- Looking for technical and performance improvements in the chosen solution and at the same time ensuring required documentation is completed and automation standards are adhered to in our modern Agile working environment.
- Having the right mind set and motivation to develop yourself and learn new things.
- Provide input for test strategy in order to define the approach and processes to be used and therefore gain agreement and consistency for all testing phases;
- Ensure test pre-requisites are planned and managed (including test documentation, data and environments);
- Test Engineer will work closely together with the Test Manager Netherlands and other colleagues in Germany and UK.

KEY CAPABILITIES , KNOWLEDGE, SKILLS AND EXPERIENCE

- Minimum of a HBO work and thought level;
- Proven experience in a BI/data warehouse environment as a software tester;
- Experience in the financial sector, with main focus in the banking sector;
- Excellent communication skills both in Dutch and English, verbal and writing
- Knowledge and experience of ETL development methods and best as well as experience in BI related test methodologies;
- Experience with functional and technical test environments
- Knowledge of a programming language (Java, JavaScript, C#, C++, .Net
- • Deep understanding of web, API & database testing technologies and frameworks (HTML, CSS, jQuery, XML, JSON/REST, No-SQL databases, SQL)
- A quality mindset
- Experience with exploratory testing
- Experience with test automation
- Experience with continuous integration and deployment including the use of GIT / TFS.
- Knowledge and experience of working in Agile/Scrum projects;

WE OFFER
