

Test Engineer BI/IT (M/V)

Lloyds Bank, locatie Amsterdam

Lloyds Bank is onderdeel van Lloyds Banking Group, de grootste bankengroep van het Verenigd Koninkrijk. De Nederlandse vestiging, met ruim 130 medewerkers, is anders dan andere Nederlandse banken. Dat merk je aan onze eigenzinnige, gedurfde visie op de markt. Aan onze innovatieve producten en diensten. En natuurlijk aan de korte lijnen voor onze klanten. Lloyds Bank doet jaarlijks mee aan de Great Place To Work survey, waarbij we een plek op de lijst van 'Best Workplaces' verdienen!

Voor onze afdeling Systems & Digital zijn wij op zoek naar een: Test Engineer BI en IT.

CORE PURPOSE OF THE ROLE

The Test Engineer is part of the Systems & Digital Team and reports to the Manager Systems & Digital NL.

The Test Engineer is responsible for the implementation; execution and delivery of the testing activities to ensure quality. The Test Engineer produces a test plan in order to define the approach and processes. The Test Engineer delivers the testing process so that all relevant requirements are met. He/she proactively manages and mitigates risks and issues, identifying gaps and providing solutions to QA delivery problems. The test Engineer monitors quality and makes sure (automated) tests are developed, performed and managed. He/she arranges the availability of the testing environment and report the progress of the testing process.

He/she supports in gathering detailed IT requirements in projects or working groups. This includes translating business needs into functional and non-functional system requirements, takes part in technical assessment and solution workshops with suppliers.

The Test Engineer will work closely together with the Test Manager Netherlands and colleagues in Germany and UK.

KEY ACCOUNTIBILITIES

Applies QA in order to provide high-quality testing services for the Bank, and general quality assurance of the internal processes in close corporation with test manager NL.

- Efficiently plan and track development/support/testing deliverables and ensure stakeholders are regularly informed of status and progress within the platform
- Ensure the business needs are understood and delivered against in each step of the delivery lifecycle or service delivery to ensure the end products meet the business customers' needs
- You position yourself as an engineer with a specialisation in Cloud services, SaaS / PaaS and Apps and also a passion for continuous improvement of our architecture. You can quickly and efficiently solve (potential) problems. You work together with other specialists proposing solutions for complex problems.
- Continuously questioning and investigating the chosen solutions to discover potential issues preventing the optimal working of the system.
- Building and maintaining automated test suite(s).

- Challenging the developers and business analyst on all topics related to quality.
- Looking for technical and performance improvements in the chosen solution and at the same time ensuring required documentation is completed and automation standards are adhered to in our modern Agile-working environment.
- Having the right mindset and motivation to develop yourself and learn new things.
- Provide input for test strategy in order to define the approach and processes to be used and therefore gain agreement and consistency for all testing phases;
- Ensure test pre-requisites are planned and managed (including test documentation, data and environments)

KEY CAPABILITIES , KNOWLEDGE, SKILLS AND EXPERIENCE

- Minimum of a HBO work and thought level;
- Understanding of a programming language (Postman, Java, JavaScript, C#, C++, .Net
- Understanding of web, API & database testing technologies and frameworks like (HTML, CSS, jQuery, XML, JSON/REST, No-SQL databases, SQL)
- Strong interpersonal skills and a hands-on mentality are essential to this role.
- Striving for continuous improvement of existing processes and practices
- Strongly customer-focused and quality minded
- Displays social competencies in cross-functional and cross-cultural teams
- A quality mind-set
- Fluent in Dutch.
- Good verbal and written communication skills in both Dutch and English.
- Working experience 0-3 year
